Workshop Systems

550 SERIES

Product catalogue

It's time to rethink workplace furniture!

As a product designer, I am passionate about the combination of quality, function and appearance of our products, which is why so much thought has gone into the **New 550 Series** of workplace furniture.

It doesn't cost more to design something well, so we started with a clean sheet of paper and a 'how can we make this better' approach. We designed a range of workplace furniture that would give a consistent, modern appearance throughout the workplace – from warehouse to workshop to office, and enhance the working environment. We made our modular system both logical and simple to configure so that it can be used as a single item or completely integrated.

We included many of the features that have made our unique workshop furniture system so successful amongst the World's leading automotive brands. It has gained us the Queen's Award for International Trade 2012 and the prestigious 'Red Dot' design award. Manufactured in Britain and British owned, Dura's reputation for the 'benchmark' quality of its products is matched to that of its customer service. We hope you agree, it's time to rethink the workplace!

Dominic Wislade
Managing Director

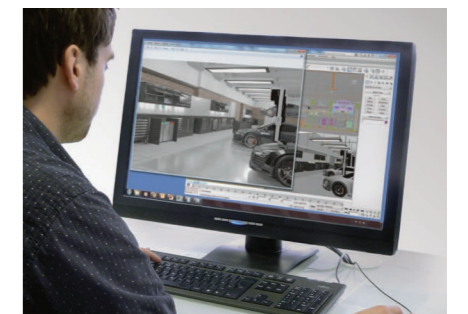

DURA: World-class design expertise

When you invest in Dura furniture you can be sure that you are buying something of real quality. Dura's award winning equipment is used in the workshops of the most prestigious automotive brands Worldwide, and for good reason. Dura transformed the automotive workshop with its revolutionary modular furniture system and, despite many copies; it remains the system of choice. Think of a leading prestigious automotive brand and the chances are that they either recommended or insist upon Dura.

We use the very latest manufacturing technology to assure you of consistent quality time after time backed by Dura's legendary service and product guarantee.

THE 550 SERIES

Perfectly designed, beautifully made
...Just right for your workplace!

The new 550 Series from Dura represents a simple, logical and design led approach to workplace furniture. Aesthetic and ergonomic, it's designed around a totally modular philosophy that means you can have the system that meets your exact requirements and will give your workplace a modern, efficient appearance. Designed by Dura – the choice of leading prestige automotive brands for their workshops, the 550 series is **the workplace furniture system of the future, today.**

The logical 550 Series system...

1 Three modular widths...

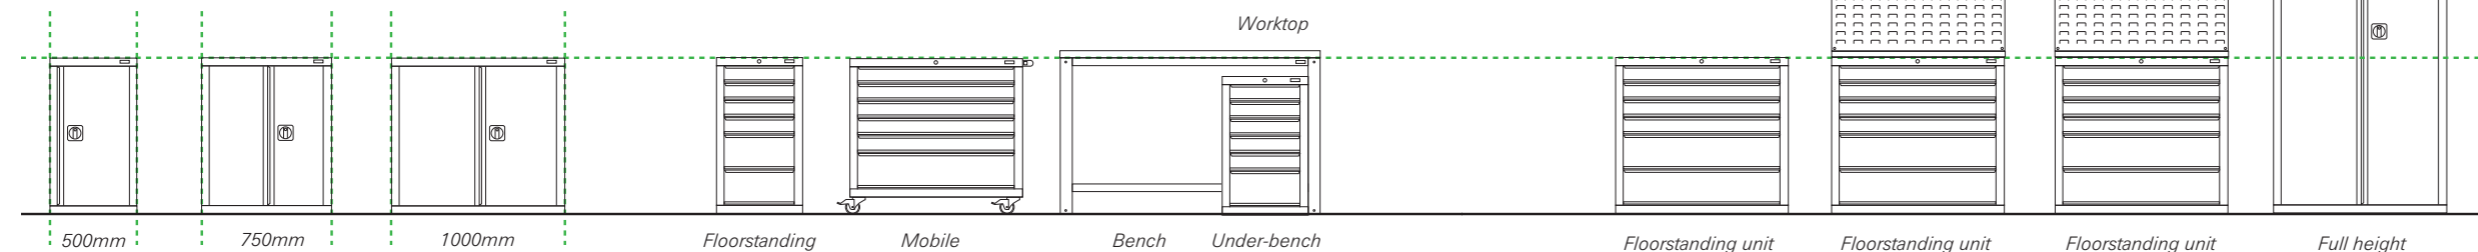

All units designed to 500mm, 750mm & 1000mm modules, to make product selection and integration simple.

2 Coordinated heights

The range is designed to work together, whether on the floor, on castors or under benches. Worktops can be added to floor and mobile units for further coordination with workbenches.

3 Flexible configuration...

Range includes products to provide storage options at three levels. Floorstanding units and workbenches can be fitted with back panels or back panels + wall units, to match full height tall cabinet units.

The 550 Series design features...

Heavy-duty drawers

Full extension drawers with 70kg load capacity, lined with foam as standard.

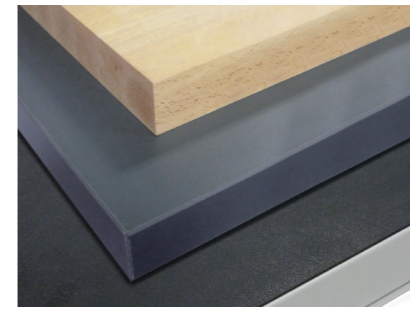

Anti-tilt system

Anti-tilt system on all drawers as standard.

DuraTuff™ finish

Smart DuraTuff™ textured paint finish for all units.

Choice of worktops

Pinseal composite top, 40mm lino tops and 40mm solid beech or multiplex.

Fully lockable

With random keys as standard, but other key configurations available.

Adjustable shelves

Easily adjustable shelves for flexible configuration.

THE 550 SERIES Product Range

The following pages outline the products within the 550 Series.

Floorstanding Units

550 Series floorstanding units can be used independently for low level storage, or linked to back panels and wall units to provide both low and high level storage.

They are 900mm high, 550mm deep, and available in modular widths of 500, 750 & 1000mm. The range offers a choice of cupboard doors and/or full-extension foam lined drawers – all fully lockable.

Floorstanding cabinets are supplied with the DuraTuff™ textured painted metal tops as standard, but can be fitted with **additional worktops** (see page 13 for details).

Lockable full-extension drawers, lined with foam

Workbenches

550 Series co-ordinated workbenches are available with the following options:

- Choice of a **lino**, **multiplex** or **beech** worktop
- Choice of height: **840mm** (standard work height including 40mm worktop)
940mm (level with floorstanding unit 900mm + 40mm worktop)
- Choice of depth: **580mm** or **730mm**
- Detachable horizontal bars to allow greater leg room or space for a floorstanding unit to be positioned underneath (see below).

Note:
Height includes 40mm worktop.
Depth includes 30mm worktop overlap.
Product supplied self assembly.

Wall Units

550 Series wall units are designed to provide high level storage above a workbench or floorstanding unit. They can be mounted directly to load bearing walls, but we recommend using backstraps, which attach the wall units and back panels directly to the workbench or floorstanding unit, providing a freestanding solution.

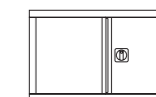

They are available in 500, 750 & 1000mm widths, and are supplied either with an inner adjustable shelf, or a square peg back compatible with the clip-on hook system (see page 11).

Lighting

550 Series wall units can be fitted with under-cabinet lighting to provide a comfortable working area beneath. Lighting is provided as pelmets housing LED lights, in the standard 500, 750 and 1000mm widths, which can be interconnected for continuous runs. These can be switched on and off individually on each light fitting.
